

KEEP TEXAS AFFORDABLE

MORE SAVINGS. MORE OPPORTUNITY.
— MORE FREEDOM. —

Affordability is on the mind of every Texan. Governor Abbott has taken historic action to keep Texas the most affordable large state in the entire country. However, more work remains to keep Texas the best state to live, work, and raise a family. Governor Abbott's plan to **Keep Texas Affordable** will save Texans thousands each year.

LOWER ENERGY COSTS

AFFORDABLE ELECTRICITY: REAL COMPETITION, REAL SAVINGS

More than five million Texans reside in areas with a single municipal power provider and cannot shop around for cheaper electricity rates. Of those five million, more than 60% are served by Austin's and San Antonio's electric utilities — the two largest municipally-owned utility districts in the state. Governor Abbott's plan will allow Texans to choose their electricity provider by opening city monopolies to retail electric competition. In Austin and San Antonio, residential ratepayers would respectively save on average 10% and 13% on their electricity bills. Affected commercial ratepayers would save on average nearly 22% on their electricity bills, or up to \$3,000 per year. Governor Abbott would also ban city utilities from imposing charges on ratepayers unrelated to electric delivery and prohibit using utility profits as a city slush fund.
